Subject: 5/16 Interagency Perchlorate Steering Committee teleconference for member agencies

Hello,

You are receiving this message because you have indicated that you will be (or may be) participating on the Tuesday, May 16 Interagency Perchlorate Steering Committee conference call. The purpose of the teleconference is to provide an update on perchlorate issues to representatives of the 23 member agencies of the IPSC and additional state or federal agency representatives. Updates will be provided on health effects studies, eco investigations, occurrence information, analytical work, treatment technologies, and communications.

The call is scheduled for Tuesday, May 16 from 1:00pm-3:00pm Eastern time (10:00am-12:00 noon Pacific time).

Please dial 919-541-5306 to join the call. Because of limited availability of teleconferencing lines, participants at the same agency location must call in to the call using one line only, per the attached chart (WordPerfect format).

516ipsc.wpd

A couple of important logistical considerations to mention for the call - once you have dialed into the call, please do not hit the "conference" or "mute" buttons on your telephone set, as this may completely disconnect the entire call. Because of the number of participants on the call, I will go over a couple of ground rules before we get started so that we can complete the items on the agenda in the designated time.

If you have any questions, please contact me at 415/744-2182. We look forward to your participation on

the teleconference.

Thank you,
Catherine McCracken
Community Involvement Specialist
USEPA Region 9, Superfund Division
